

AI Adoption in 2025

Who's Actually Using It, and Who's Not

Based on insights from *The 2025 Industry Report on Cost, Schedule, and Risk*

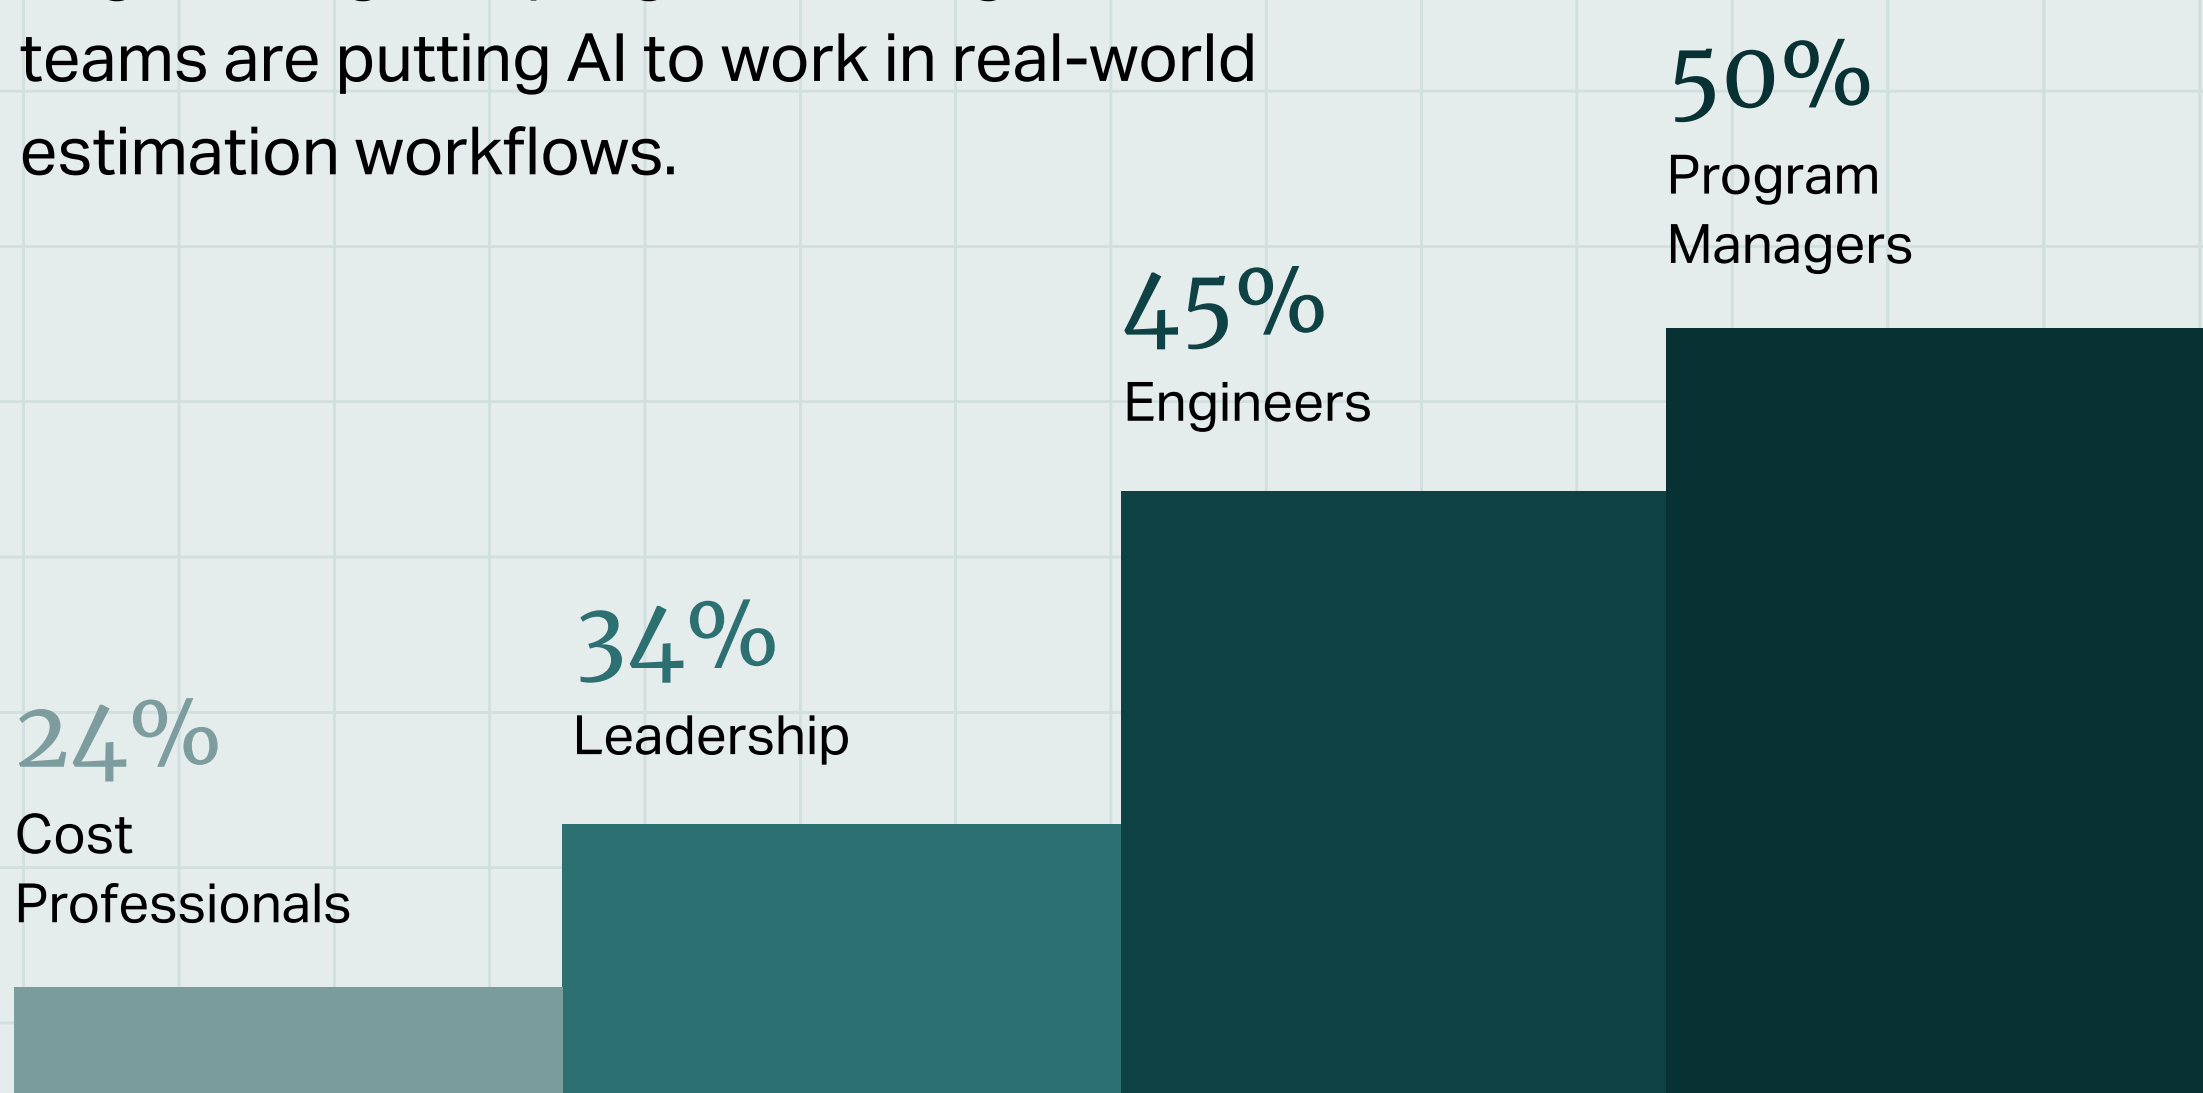

The Momentum Is Building

AI is no longer just a buzzword; it's starting to shape how organizations plan, forecast, and deliver.

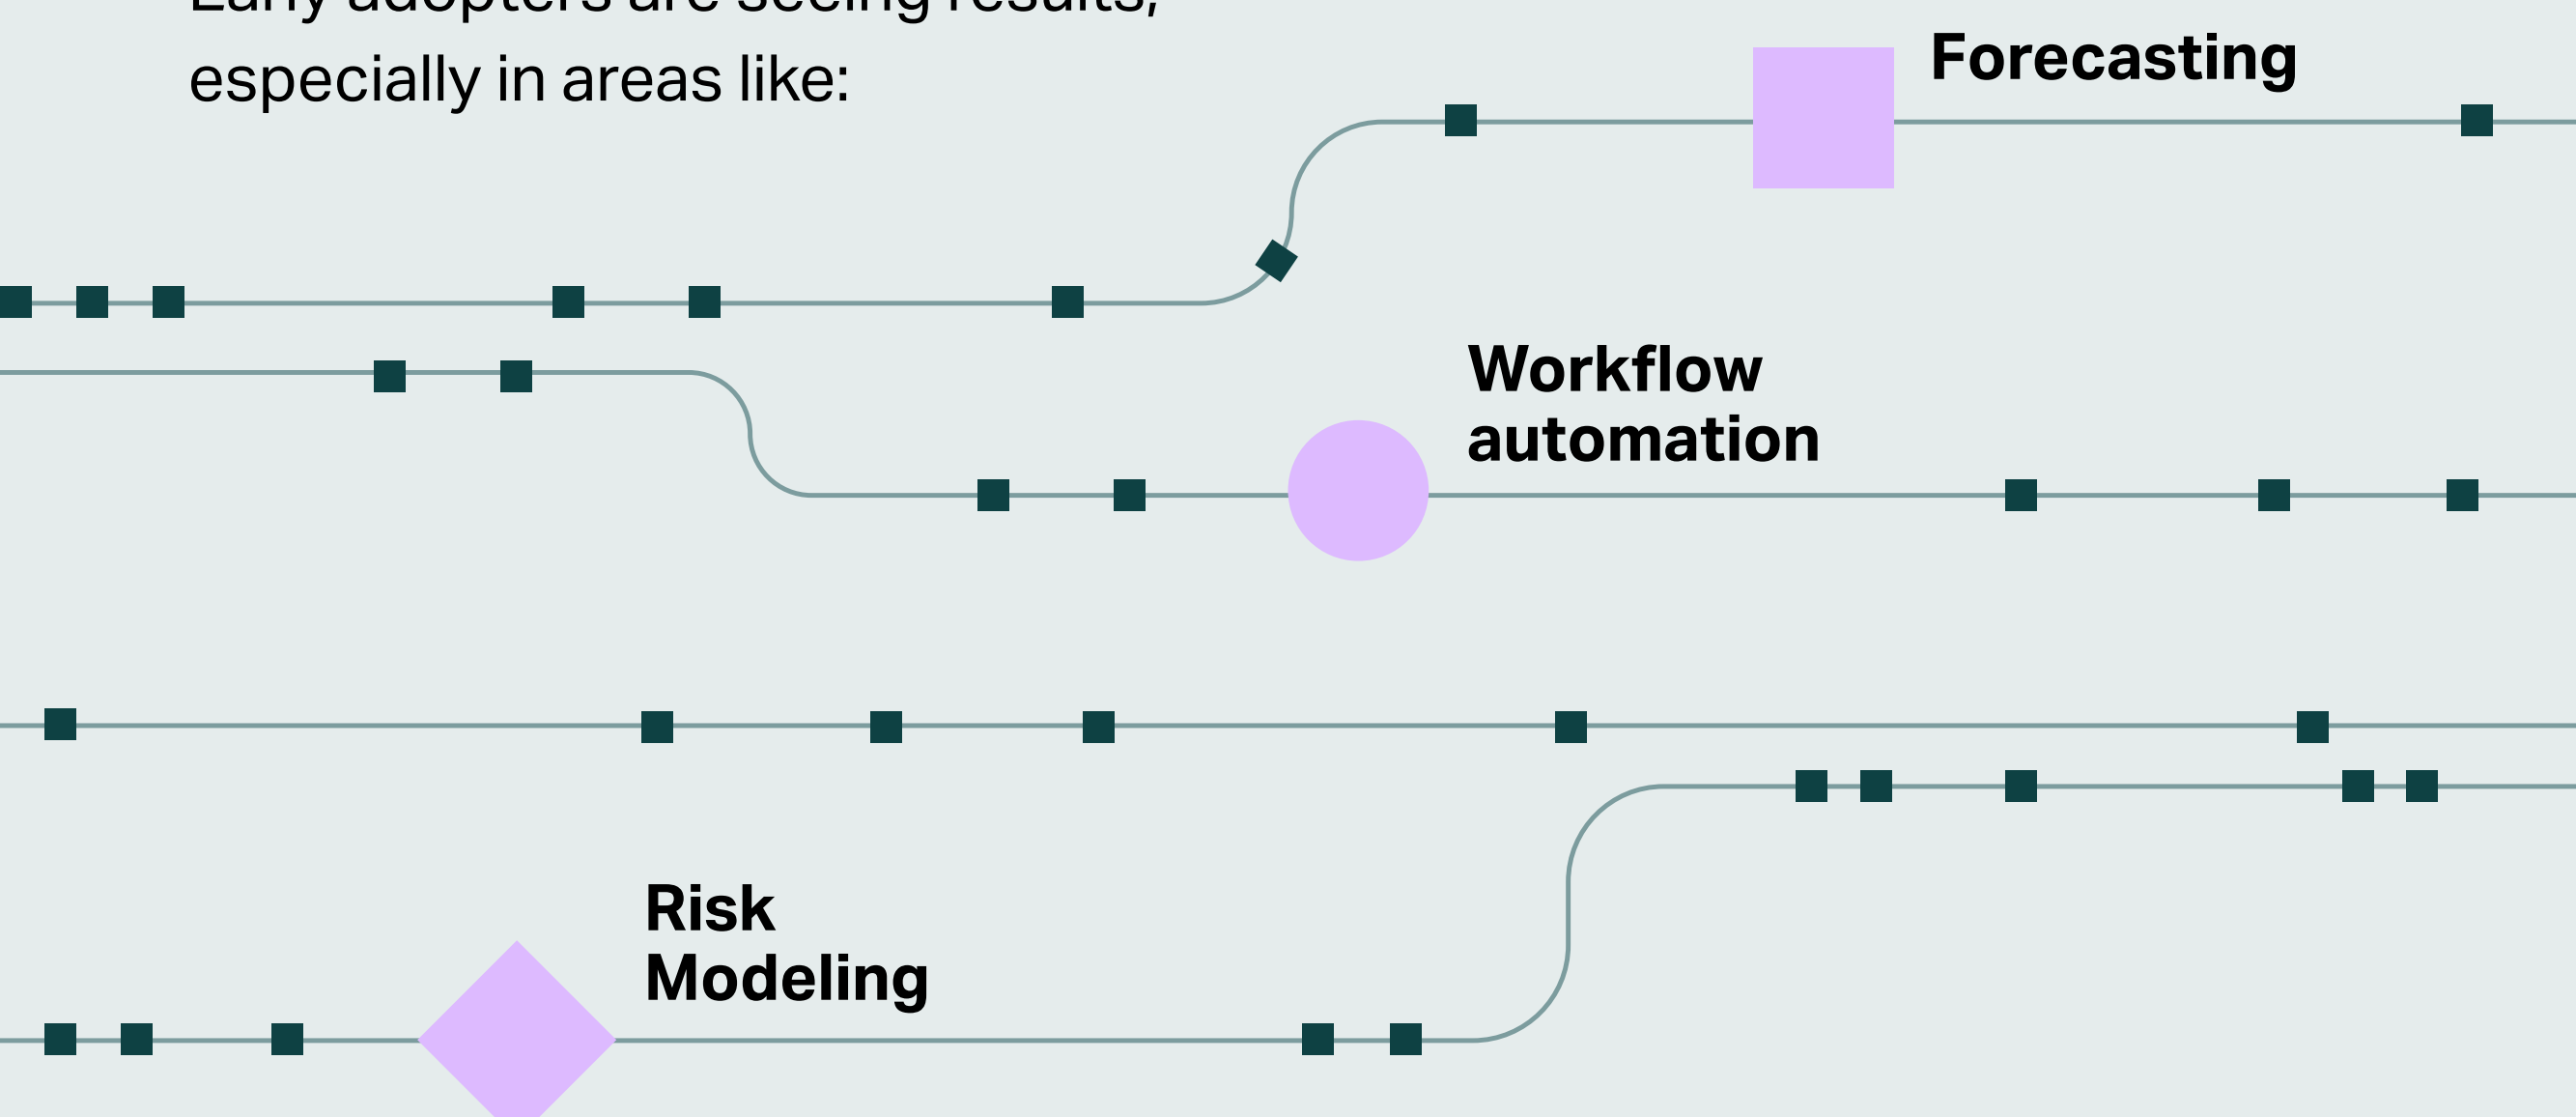

Adoption Is Still Early, But Some Roles Are Leading The Way.

Engineering and program management teams are putting AI to work in real-world estimation workflows.

From Pilots To Progress

Early adopters are seeing results, especially in areas like:

The next step?

Scaling what works across teams with the right tools, training, and trust.
